## Summary

Passionate and results-driven software engineer seeking to embark upon a rewarding new career in the tech field capitalizing on strong full-stack JavaScript skills, a high desire and aptitude for learning new technologies, and the ability to contribute meaningfully to the mission of a growing company on an accelerated ramp-up schedule.

---

## Education

**JavaScript Full-Stack Immersive Program** (2018) Hack Reactor, San Francisco, CA

**Java, Statistics, Marketing, Management** (2017) College of Marin, Kentfield, CA

**Bachelor of Management** (2009) Shandong Institute of Business and Technology, China

---

## Technology

|                   |   |
|-------------------|---|
| <b>Languages</b>  | JavaScript, SQL, Python, HTML, CSS                        |
| <b>Frameworks</b> | React, Angular, Flask, Express, jQuery, Bootstrap, Django |
| <b>Databases</b>  | MySQL, MongoDB, Redis                                     |
| <b>Platforms</b>  | Node.js, Docker, AWS - EC2, ECS                           |
| <b>Tools</b>      | Webpack, Babel, REST API, Socket.io                       |

---

## Selected Projects

### Online Collaborative Coding System

Single-handedly designed and implemented a new website where multiple users can simultaneously collaborate on coding problems, as well as sign up/log in, browse and search existing coding problems, and add new ones.

- Developed web client to be a single page application using React and Node.js
- Created data structures and data storage capabilities in MongoDB allowing for deep analysis on performance and use
- Enabled multiple users to edit a coding problem with socket.io in parallel
- Utilized Redis as a cache so that multiple users can see the same content in real-time
- Refactored and improved system throughput by decoupling services using REST API

### Show Me A Table Topic

Partnered with a Designer to develop a fully responsive, user-friendly website tailored towards directing members of the Toastmasters community to potential sources of inspiration so that they are able to contribute more meaningful and engaging topics to the group's public speaking offerings.

- Implemented a fully responsive single-page application web client using Angular, Bootstrap and Node.js
- Set up web app server with Express.js, database with MongoDB
- Refactored and improved system throughput by decoupling services using REST API
- Deployed to AWS-EC2 with Docker

## Professional Experience

---

### **Freelance Software Engineer** (Oct 2018 – Present)

- Automate processes for an ecommerce website.

### **James & Joyce Coffetel, China** (July 2014 – May 2016)

#### **Deputy General Manager**

- Managed and led sales team to achieving the top results nationwide for three consecutive months
- Built and developed an eight person, and ultimately high performing, middle-management team
- Hosted weekly meeting to ensure client satisfaction in an ever-changing environment
- Coached and developed staff, with an emphasis on developing customer service fundamentals

### **7 Days Group Holdings Limited, China** (July 2010- June 2014)

#### **General Manager/General Manager Assistant/Management Trainee**

- Proactively identified and led several new initiatives that ultimately boosted occupancy rate from 60% to 90%, including: improving the quality of service; modernizing guest rooms; up-leveling the volume and sophistication of online and social media marketing efforts; developing and strategically placing engaging offline marketing collateral; and setting metrics-driven performance goals for sales team and utilizing data to identify and address obstacles towards reaching optimal levels
- Slashed cost by 18% by optimizing and streamlining operating procedures
- Mentored 3 employees who later become Hotel General Managers
- Maintained and enhanced customer satisfaction by providing ongoing, proactive support throughout the customer life cycle
